Packaging Contents

- 1x Plate
- 1x Connecting Wire

Installation

WARNING! Computer equipment can be severely damaged by static electricity. Be sure that you are properly grounded before opening your computer case or touching your hard drive. StarTech.com recommends that you wear an anti-static strap when installing any computer component. If an anti-static strap is unavailable, discharge yourself of any static electricity build-up by touching a large grounded metal surface (such as the computer case) for several seconds. Be sure to handle your hard drive carefully and consult your hard drive and laptop manufacturer for details on how to remove the drive.

1. Connect the power cable to the adapter, if it is not already connected. The adapter has a "B" (for black wire) on one side and an "R" (for red wire) on the other to help you connect the power cable.
2. Connect the female end of the adapter to your notebook hard drive making sure that Pin 1 on the hard drive is aligned with Pin 1 on the adapter. (Pin 1 on the adapter is the labeled pin furthest from the power connector)

WARNING! Connecting the adapter to the drive incorrectly can severely damage or destroy your hard drive. The location of Pin 1 on the hard drive depends on the model of hard drive you are using. If you are unsure of the location of Pin 1 on your hard drive, contact the hard drive manufacturer before attempting to connect the drive.

3. Make sure that your computer is turned off and that you are grounded. Remove the cover from your PC.
4. Attach an internal IDE connector to the male end of the adapter, making sure that the red stripe is on Pin 1. (Pin 1 on the adapter is the labeled pin furthest from the power connector.)
5. Attach an internal power cable to the power connector on the adapter. The connector is formed so that it is difficult to connect the connector incorrectly.

*actual product may vary from photos

Configuring Your Adapter

If the drive is the only drive on the IDE controller, you will not need to set any jumpers on your hard drive. If there is another drive on the controller, you will need to set the Master/Slave jumper pins on your hard drive. Consult your hard drive documentation for Master/Slave pin location and configuration.

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. Regardless of any direct acknowledgement elsewhere in the body of this document, StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.

Technical Support
