One-Touch Height Adjustment

A spring-assisted design that makes it easy to adjust the height of your displays.

Articulating Arms

A flexible, jointed-arm design that makes it easy to reposition your display or tablet.

Sit-Stand Workstation

Instead of adapting to your environment, adapt your environment to you. Our sit-stand workstation helps you to eliminate the health concerns linked to sitting in a chair all day, while creating a highly functional workstation. Adjust your position from sitting to standing with one touch.

Some distributors also offer bundles containing two of our ergonomic products: the Sit-to-Stand Workstation (ARMSTS) and a monitor mount. Bundles make it easy to find ergonomics products that work beautifully together.

*Individual products can be purchased separately.

Gooseneck Arms

Sturdy, bendable arms that let you adjust the position of your tablet with ease.

Desk Mount

A small-footprint, c-clamp or grommet-style mount, that lets you secure your monitor to your desk or work surface.

Desktop Stands

A simple, non-fixed platform that provides an easy way to mount your monitors or all-in-one computer above your desk.
