Packaging Contents

- 1x 4 Post Heavy Duty Rack Assembly Kit
- 1x Assembly instructions
- 1x Pack of 50 Screws and Nuts

Tools Required

- 2 x 14mm wrench

Assembly

1. Lay the vertical rails face down. At one end, place a top/bottom rail and insert three hex head bolts and fasten with three head nuts.

2. Install a second top/bottom rail at the other end of the vertical rail.

3. Repeat Step 2 to attach the second vertical rail. Repeat Steps 1 to 3 to assemble the other side.

4. Connect the vertical rails together using the join brackets. Insert the hooks into the slots on the vertical rails. Insert two hex head bolts and fasten with two head nuts for each side.

WARNING! To prevent bodily injury, please ensure that the rack is installed in a structurally sound environment with a level floor and that all hardware has been assembled securely, and checked for stability before loading equipment. When installing equipment into the rack, start from the bottom of the rack first and move upwards, keeping the heaviest equipment at the bottom to avoid a situation where the rack becomes top-heavy.

5. Securely attach the join brackets at the top and bottom ends on a single side first. Then reverse the rack and repeat the same steps on the other side.

6. Finished assembly of rack.

7. Stand up the frame and check that all the bolts are tightened.
