Installation

This device is natively supported in compatible operating systems and supports plug-and-play installation.

Important operation notes

- The USB-C port on your computer must support DisplayPort over USB-C (DP Alt mode) in order to work with this MST hub.
- MST is certified for operation with Microsoft® Windows 10, 8/8.1 and 7 devices.
 - MST is currently not supported by other operating systems such as Mac OS X and Chrome OS™.
 - Other operating systems might adopt MST in the future. Verify MST support with your operating system manufacturer.
 - Operating system support is subject to change. For the latest requirements, please visit: www.StarTech.com/MSTCDP123HD.
- After the MST hub has been connected to your computer it may be necessary to initiate the operation of additional displays from within your Windows **Display Settings**.
- The SCAN button resyncs all of the attached displays, and can be utilized if any of the displays are not detected
- The MST adapter works with HDMI cables up to 15 ft. in length.
- Certain graphics adapters have limited MST support and will only output to three displays in total. If more than three monitors are attached, the fourth will be disabled, including built-in laptop monitors or touchscreen displays.
- MST shares 21.6Gbps of bandwidth across all attached displays. Higher resolutions can restrict the bandwidth available for the remaining ports. Please see our guidelines below for determining the ideal resolution for your setup.

Average resolution bandwidth allocation

1920x1080 (High-definition 1080p) @60Hz – 22%

1920x1200 @60Hz – 30%

2560x1440 @60Hz – 35%

2560x1600 @60Hz – 38%

3840x2160 (Ultra HD 4K) @30Hz – 38%

Note: Exceeding 100% will prevent monitors from turning on.
