### 2-Port PCI Express Serial Card with 16950 UART - Low-Profile

#### Product Diagram (PEX2S953LP)

![Product Diagram](image)

#### Requirements

- PCIe Slot
- Needle-Nose Pliers

For the latest requirements and full manual, please visit [www.startech.com/PEX2S953LP](http://www.startech.com/PEX2S953LP).

#### Installation

**WARNING!**

PCI Express Serial Cards can be severely damaged by static electricity. Make sure that you are properly grounded before you open your Computer Case or touch the PCI Express Serial Card. You should wear an Anti-Static Strap when you install any computer component. If an Anti-Static Strap isn’t available, discharge any built-up static electricity by touching a large Grounded Metal Surface for several seconds. Only handle the PCI Express Serial Card by its edges and don’t touch the gold connectors.

**Jumper Configuration**

*Note: Jumper configuration is a requirement when connecting Serial Devices that require power through a Serial Port.*

This Jumper can be moved into one of three different positions in order to set the power output voltage for the Serial Ports. The default setting for the Jumper is RI, which is the setting for no power. The Jumper can be moved to one of the other two settings for 5V or 12V of power. To configure the Jumper, complete the following:

1. Locate the Jumper for Port One. Port One is located on the right hand side, labeled as COM1 on the Printed Circuit Board. The Jumper is labeled as J1 on the Printed Circuit Board.
2. Carefully remove the Jumper. Lift the Jumper straight up and off of the PCI Express Serial Card.
   *Note: Always hold the Card by the edges.*
3. Determine the power setting that is required for Port One.
4. Position the Jumper over the set of Pins that correspond with the desired Serial Port Power Setting. See Figure 1 to determine where the Jumper should be positioned.
5. Push the Jumper straight down and into place.
   *Note: Push the Jumper all the way into position for proper contact.*

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by StarTech.com could void the user’s authority to operate the equipment.

Industry Canada Statement

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

CAN ICES-3 (B)/NMB-3(B)

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:

1. L’appareil ne doit pas produire de brouillage, et
2. L’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même s’il est susceptible d’en compromettre le fonctionnement.

IC Radiation Exposure Statement

This equipment complies with IC RSS-102 radiation exposure limit set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0.5 cm between the radiator and your body.

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.

Driver Installation

You can download the latest drivers from the StarTech.com website: www.startech.com/PEX2S953LP

Navigate to the Support Page to locate the Drivers. Follow the instructions included with the Driver Files.

Warranty Information

This product is backed by a lifetime warranty.

For further information on product warranty terms and conditions, please refer to www.startech.com/warranty.

Limitation of Liability

In no event shall the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the type of product exceed the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.

Safety Measures

- If the product has an exposed circuit board, do not touch the product under power.
- Mesures de sécurité
- Si l’un des circuits imprimés du produit est visible, ne touchez pas la pièce lorsqu’il est sous tension.

Mise de sécurité
- Se il prodotto ha un circuito stampato visibile, non toccare il prodotto quando è acceso.

Säkerhetsåtgärder
- Rör aldrig vid enheter med oskyddade kretsar när strömmen är påslagen.
