FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by StarTech.com could void the user's authority to operate the equipment.

Industry Canada Statement

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe [B] est conforme à la norme NMB-003 du Canada.

CAN ICES-3 (B)/NMB-3(B)

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

Introduction

Use SDOCKU313 to easily dock and swap drives from your desktop computer or laptop by simply inserting them into the top-loading slot. There aren't any trays or tools required with this docking station and the HDD ejection button makes it easy to quickly remove drives. SDOCKU313 supports both 2.5 in. and 3.5 in. SSDs and HDDs. The USB 3.1 capabilities of SDOCKU313 provide you with greater bandwidth and speed with file transfer rates up to 10Gbps, twice the speed of USB 3.0 (USB 3.1 Gen 1) technology.

Packaging contents

- 1 x USB 3.1 dock for SATA drives
- 1 x USB 3.1 A-to-B cable
- 1 x universal power adapter
- 4 x power adapter plugs (NA/EU/UK/AU)
- 1 x quick install guide

System requirements

- USB-enabled computer system with an available USB port
- 2.5 in. or 3.5 in. SATA HDD or SSD

Note: To obtain the maximum USB throughput, you must use a computer with a USB 3.1 Gen 2 (10Gbps) port.

Operating system requirements are subject to change. For the latest requirements, please visit www.startech.com/SDOCKU313.

Setting up the dock

Install the drive

Warning! Drives and storage enclosures should be handled carefully, especially when they're transported. If you're not careful, you may lose data as a result. Always handle storage devices with caution.

1. Connect the external power adapter from the docking station to a power outlet.
2. Connect the included USB 3.1 cable from the drive dock to a USB port on your computer system. Your computer can be turned on or turned off when you connect the USB cable.
3. Insert a 2.5 in. or 3.5 in. HDD or SSD into the drive slot on the top of the docking station. Make sure that the connectors on the drive are facing the same corner of the slot that has a cutout in the door. The label on the drive should face the front of the dock.
4. Press the **Power** button on the top of the drive dock. The LED indicator under the power button should light up to indicate that the dock is powered on. The LED indicator blinks when the drive is being accessed.

Prepare the drive for use

If you install a drive that already has data on it, after you insert the drive, it appears under **My Computer** or **Computer** with a drive letter assigned to it.

If you install a brand-new drive that doesn't contain any data, you must prepare the drive for use.

If you use a computer that's running Windows® 2000, Windows® XP, Windows Vista®, or Windows® 7, do the following:

1. Depending on the OS version that you're running, do one of the following:
 - On your desktop, right-click **My Computer**.
 - On your desktop, right-click **Computer**.
2. Click **Manage**.
3. On the **Computer Management** screen, click **Disk Management**.
4. Locate the disk that is labeled **Unallocated**. To confirm that the drive is the correct one, check the drive capacity.
5. Right-click the section of the window that says **Unallocated** and depending on the OS version that you're running, do one of the following:
 - Click **New Simple Volume Wizard** and complete the instructions.
 - Click **Create Partition Wizard** and complete the instructions.

- Click **New Partition Wizard** and complete the instructions.

When the drive is successfully installed, it appears under **My Computer** or **Computer** with a drive letter assigned to it.

About driver installation

No driver or software installation is required for this product because the drive dock is natively supported and the drivers are already installed.

Using the docking station

Remove the drive

Note: Make sure that the drive isn't being accessed by the computer before you proceed.

1. To remove the drive from your operating system, do one of the following:
 - On computers running a version of Windows, on the Taskbar notification area, click **Safely Remove Device**.
 - On computers running a version of Mac OS, on your desktop, drag the drive to the **trash can** icon.

For more information, see the documentation that came with your operating system.

2. Press the **Power** button on the top of the dock and wait for the dock to finish powering down.
3. To release the drive, press the **Drive eject** button on the top of the docking station.
4. Pull the drive from the drive slot on the top of the docking station.

About the LED indicators

The LED indicator on SDOCKU313 is located underneath the **Power** button on the top of the dock. For more information about what the LED indicators represent, consult the table below.

LED behavior	Meaning
LED indicator is solid blue	The dock is turned on and receiving power.
LED indicator is red and blinking regularly	A process (like read or write) is being completed.

Troubleshooting

Test the components in your setup

If you followed the steps to set up your docking station and it still isn't working, you can test to make sure that the components of your setup are working correctly and aren't the source of the issue.

Tip: When you test the cables in your setup, you should test each cable individually and use short cables where possible.

To test the components, try the following:

1. Use the cables, drives, and dock in another setup. If the components work in the second setup, the problem likely isn't with the components and you can proceed to the second step.
2. One component at a time, swap out the cables, drives, and dock for components that you know work in other setups.

Check to see how the drive is listed in Disk Management

To determine if the error is with the drive that you're using, complete the following:

1. On a computer running a version of Windows, press the **Windows** key + **R**, type **diskmgmt.msc**, and press **Enter**.
2. Check to see if your drive is listed. If the drive is listed as **healthy** but doesn't have a drive letter next to it, right-click **healthy** and click **Change Drive Letter and Paths**.
3. Click **Add**.
4. Assign a drive letter (for example, E:).
5. Click **OK**.

Note: A formatted drive won't show up in **Computer** or **My Computer** until it has a drive letter assigned to it.

Technical support

StarTech.com's lifetime technical support is an integral part of our commitment to provide industry-leading solutions. If you ever need help with your product, visit www.startech.com/support and access our comprehensive selection of online tools, documentation, and downloads.

Warranty information

This product is backed by a two-year warranty.

StarTech.com warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replacement with equivalent products at our discretion. The warranty covers parts and labor costs only. StarTech.com does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability

In no event shall the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the use of the product exceed the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.

Hard-to-find made easy. At StarTech.com, that isn't a slogan. It's a promise.

StarTech.com is your one-stop source for every connectivity part you need. From the latest technology to legacy products — and all the parts that bridge the old and new — we can help you find the parts that connect your solutions.

We make it easy to locate the parts, and we quickly deliver them wherever they need to go. Just talk to one of our tech advisors or visit our website. You'll be connected to the products you need in no time.

Visit www.startech.com for complete information on all StarTech.com products and to access exclusive resources and time-saving tools.

StarTech.com is an ISO 9001 Registered manufacturer of connectivity and technology parts. StarTech.com was founded in 1985 and has operations in the United States, Canada, the United Kingdom and Taiwan servicing a worldwide market.
