Hardware Installation

PC BIOS Notice
The following BIOS setup changes may be necessary for PC users.
1. In STANDARD CMOS, set HALT ON ERROR to ALL BUT KEYBOARD1.
2. In PNP AND PCI SETUP, set PNP OS INSTALLED to YES and set USB IRQ to ENABLED.
NOTE: The KVM provides USB keyboard and mouse switching from one computer to the other. If you plan to share other peripheral devices (printer, scanner, etc.) using the built in USB HUB, it is recommended that the software for each device be shut down prior to switching between computers.

Console Connection
Before installation, ensure that all devices and computers to be connected to the KVM are powered off.
1. Connect one or two DVI monitor(s) to the KVM's DVI port.
2. Plug a USB keyboard and mouse into the KVM's keyboard and mouse ports.
3. (Optional) Connect an audio device, and microphone to the KVM's speaker and microphone ports.

Computer Connection
1. Connect one or two DVI cables from the DVI out port(s) on each computer, to the corresponding DVI monitor port(s) on the KVM.
2. Connect the power adapter into a wall outlet or other suitable power source.
3. (Optional) Connect a 3.5 mm audio cable to the Microphone (pink), and the audio (green), out ports on each computer to the corresponding microphone and audio in port on the KVM.
4. Power on each of the connected DVI monitors. Then Power up each of the computers on at a time. After the computers are powered on, the keyboard and mouse will be recognized. The KVM switch is now ready to use.
