FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. Regardless of any direct acknowledgement elsewhere in the body of this document, StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.

Introduction

The USB32DPPRO USB 3.0 to DisplayPort® Multi Monitor Adapter functions as an external DisplayPort video card, turning an available USB 3.0 port into a DisplayPort output, with support for high resolution 2560x1600 video, and 5.1 surround sound audio. The USB 3.0 DisplayPort adapter delivers a convenient, high-performance external video solution that makes it easy to add multi-monitor capability to a USB 3.0-enabled desktop or laptop computer (optimal performance from USB 3.0, backward compatible with USB 2.0).

Leveraging the high-bandwidth (5 Gbps) SuperSpeed USB 3.0 interface, the adapter delivers smooth, high-definition content to your DisplayPort-capable display, and can be used to mirror your primary desktop, showing the same image on each display, or to extend your desktop to double your workspace and increase your productivity.

Backed by a StarTech.com 2-year warranty and free lifetime technical support.

Note: Connect a maximum of five USB32DPPRO adapters on a single PC - See system requirements

Packaging Contents

- 1x USB 3.0 to Displayport Adapter
- 1x Driver CD
- 1x Installation Guide

System Requirements

- USB enabled computer system with available USB 3.0 or 2.0 port
- CPU: Quad Core 2.4GHz or Higher (i5 recommended)
- RAM: 4GB or higher
- Microsoft® Vista(32/64-bit) 7(32/64-bit) or Mac OSX®

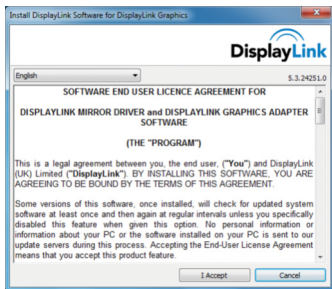

Installation

Windows Installation

Please ensure that the driver installation is complete prior to the physical installation (plugging in) of the USB 3.0 Video Adapter

1. Download the latest drivers from the StarTech.com website (recommended), or insert the included Driver CD into your CD/DVD-ROM drive.
2. Locate the Setup.exe application. This file will be located in the root directory of the Driver CD (e.g. D:\) or downloaded file.
3. Executing the Setup.exe application will launch the following screen. Please click I Accept to start installation process. The set-up program will install the device driver and software application respectively.

***Ensure that the USB Video Adapter is not connected to the host computer.**

***The screen may flash or go black during installation. No additional message will be displayed to alert that the installation has completed.**

- Once DisplayLink Core Software screen has disappeared Connect your USB32DPPRO device via the USB cable to your PC.

- The system will initiate driver and software application (the DisplayLink Software Configuration screen may flash or go black during the install).

***Some machines may require a system reboot for the USB Display Adapter to initialize.**

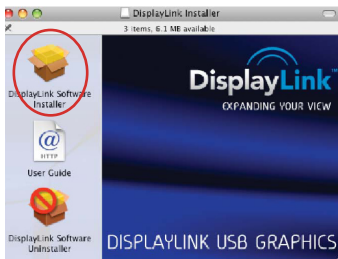

- Connect your Displayport monitor to the available Displayport on the USB32DPPRO device.
- The USB Video Adapter is now ready for use.

Mac OSX Installation

- Insert the Driver CD (included) into the CD/DVD-ROM drive.
- Browse through the Driver CD and locate the "DisplayLink-OSX" .dmg file. Double-click on this file to begin the installation process:
- Double Click the "DisplayLink Software Installer.pkg" to install the software.

DisplayLink-OSX.dmg

- Once the installation is complete, click the “Restart” button. The computer will automatically reboot, so make sure to close/save any files you have opened, before pressing this button.

- After the computer has restarted, plug in the USB Display Adapter to an available USB port. The adapter should now be ready to use.
- If you wish to add additional USB Display Adapters, simply plug them into available USB ports. A maximum total of 4 USB Display Adapters can be used on a computer.

Multiple USB Video Adapter Installation

Ensure you have the latest version of the drivers installed, otherwise, please download them from the StarTech.com website (www.startech.com).

- Complete the standard driver installation steps, up to when you plug in the first USB Video Adapter.
- Connect another monitor/display to the second USB Video Adapter, and turn on the display.
- Connect the USB type A connector on the second USB Video Adapter to an available USB 3.0 port on the host computer. The driver installation will begin automatically.

Repeat these steps for each additional USB Video Adapter you wish to install. Once all USB Video Adapters are installed, reboot the computer. After rebooting, you may be prompted to reboot one final time; please do so.

Configuring the USB Video Adapter

Windows®

When devices are attached, an icon appears in the taskbar. This gives you access to the DisplayLink manager menu.

1. From the taskbar, click the Show hidden icons arrow to show all available icons.

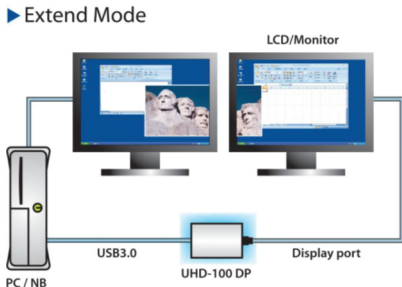

2. Click the DisplayLink icon, then click UHD-100 DP. A menu appears with configurable options. These are shown and described below.

Extend

The monitor attached to the USB32DPPRO USB Graphics adapter displays an extension of the user's active Windows desktop. The extra desktop area is a great productivity aid, allowing more applications or documents to be visible at a time. The device is now extended in the direction it was the last time the display was in this mode. For more control, use the Extend To submenu and select one of the options. This puts the device into extend mode, and places it to the Left/Right/Above/Below the main (primary) monitor.

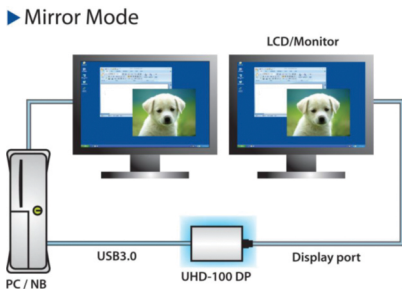

Mirror

The monitor attached to the USB32DPPRO USB Graphics device displays a duplication of the primary display.

The resolution, color depth and refresh rate of the primary screen are replicated on the monitor connected to the USB Graphics device.

Please Note: If the monitors used are of different specifications, the system's primary graphics adapter will scale all settings to lower specification to maintain a uniform aspect ratio.

Extend To

This option allows you to specify the physical location of the monitor connected to the USB32DPPRO in relation to the systems on board monitor.

Screen Resolution

This option allows you to change the resolution on the monitor connected to the USB32DPPRO device. Simply select the desired option from the list of supported resolutions displayed in the sub menu.

Screen Rotation

This option allows you to change orientation in which the screen is viewed. The two most common types of orientation are portrait and landscape.

Set as Main Monitor

Selecting this option allows your computer to consider the monitor connected through the USB32DPPRO as your primary monitor. Your primary monitor displays all system notifications, and takes priority with applications.

Notebook Monitor Off

Selecting this option disables the onboard system monitor. Please note this will disable the monitor on a Desktop, or Notebook computer.

Off

This option disables the monitor connected to the USB32DPPRO.

Mac OSX

To configure the display settings and monitor positions, bring up the **Displays** Preferences from the **System Preferences** menu:

The Display settings for each display will appear on the individual monitors themselves. To configure them all from a single location, press the “Gather Windows” button and each screen’s Displays Preferences windows will appear on that display.

All supported video resolutions will appear in the list on the left side. To change the positioning of each display, click on the “Arrangement” button (found only on the primary display) and you can then virtually reposition each display.

Using the Adapter in Extended or Mirror Mode

By default the USB Display Adapter will be setup as an extended display. To change the display as a mirrored/cloned display, check the “Mirror Display” box on the “Arrangement” page for that monitor’s Displays settings window. To return the monitor to an extended display, uncheck this option.

To use both extended and mirrored displays simultaneously, turn off mirroring then in the “Arrangement” page press and hold the ‘cmd’ and ‘alt’ keys and drag and drop the display you wish to mirror over the primary display (shown with the white bar).

Repeat this with each display you wish to mirror, all others will act as an extended display.

Changing the Primary Display

You can change which display is the primary display by moving the Menu Bar between displays. Changing the primary display affects where new windows appear and the position of the Dock.

To move the Menu Bar, click the white menu bar and drag it to the display you wish to become the primary.

Configuring Displays from the Menu Bar

If you have checked the “Show displays in menu bar” in the Display Preferences window, then you can configure displays by clicking the display icon in the menu bar. This will show a menu similar to the following:

Media Playback

Please note that while operating in Extended Mode, USB Display Adapter can display media files and DVDs using a broad variety of media players, however in Clone Mode, limited support is available for video playback.

Specifications

Audio Specification	5.1 Channel Surround (48Khz)

Warranty Information

This product is backed by a two year warranty.

In addition, StarTech.com warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replacement with equivalent products at our discretion. The warranty covers parts and labor costs only. StarTech.com does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability

In no event shall the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the use of the product exceed the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.

Hard-to-find made easy. At StarTech.com, that isn't a slogan. It's a promise.

StarTech.com is your one-stop source for every connectivity part you need. From the latest technology to legacy products — and all the parts that bridge the old and new — we can help you find the parts that connect your solutions.

We make it easy to locate the parts, and we quickly deliver them wherever they need to go. Just talk to one of our tech advisors or visit our website. You'll be connected to the products you need in no time.

Visit www.startech.com for complete information on all StarTech.com products and to access exclusive resources and time-saving tools.

StarTech.com is an ISO 9001 Registered manufacturer of connectivity and technology parts. StarTech.com was founded in 1985 and has operations in the United States, Canada, the United Kingdom and Taiwan servicing a worldwide market.
