- Phillips head screwdriver
- Cage nut tool (optional)
- 10 mm wrench

Warnings!

Product installation and mounting should be completed by a certified professional as per the local safety and building code guidelines.

Read the entire Quick-Start Guide and ensure the instructions are fully understood before using this product.

Before adding equipment to this product, ensure this product has been properly mounted.

Never operate this product if parts are missing or damaged.

Ensure the weight of the equipment does not exceed the weight capacity of this product. If the weight capacity is exceeded, personal injury or damage to the equipment is possible. This product can support the following weight: 44 lb (20 kg).

Installation

Mount the Wall-Mounting Bracket

Warnings!

StarTech.com Ltd. is not responsible for any property damage and/or personal injury resulting from the installation procedures outlined in this technical document.

The mounting instructions and/or hardware included with this product may not be suitable for the specific wall structure used. If you lack the necessary expertise required to attach this product to the wall structure or to assess the suitability of the hardware provided, please contact a professional installer.

If you lack the necessary expertise to wall mount this product, contact a construction professional to install the wall mount or to provide specific mounting instructions for the wall structure.

Wall structures vary. Ensure the type of wall structure and mounting hardware will properly support the mounted equipment. Failure to do so might result in personal injury and/or equipment damage. The wall structure should be capable of supporting at least four times the weight of the mounted equipment.

Note: The Mounting Holes are 16 inches (406 mm) apart.

1. Determine the target position of the **Wall-Mounting Bracket**, factoring in:
   - Wall type (i.e., drywall, wood studs, or concrete).
   - Dimensions and location of any nearby objects, mechanical, electrical, and plumbing infrastructure.
2. Mount the **Wall-Mounting Bracket** to the wall using the included hardware.

   Note: The included Wall-Mounting Screws are for wood only.

Install the Cage Nuts

1. Install the **M6 Cage Nuts** into the **Mounting Holes** on the **Mounting Posts**. If available, use a **Cage Nut Tool** or your preferred installation method to install the **Cage Nuts**.

   Note: Repeat Step 1 as many times as needed to install the required M6 Cage Nuts for the application. Most Server Rack Equipment requires at least four Cage Nuts for installation.

2. Align the **Mounting Holes** on the **Server Rack Equipment** with the **M6 Cage Nuts** installed on the **Mounting Posts**.

3. Insert the **M6 Screws** (x 4) through the **M6 Plastic Washers** (x 4), the **Mounting Holes** (x 4) on the **Rack Equipment**, and into the **M6 Cage Nuts** (x 4). Tighten each **M6 Screw** (x 4) using a **Phillips Head Screwdriver** to fasten the **Rack Equipment** to the **Mounting Posts**.

   Note: Repeat Steps 1 to 4 as many times as needed to install additional Server Rack Equipment.

Ground the Wall-Mounting Bracket

1. Remove the **Nut** on the **Grounding Point** with a **10 mm Wrench**.

2. Slide the **End Loop** of the **Grounding Wire** over the **Threaded Pole** on the **Grounding Point**, or wrap the **Grounding Wire** around the **Threaded Pole** on the **Grounding Point**.

3. Thread the **Nut** onto the **Threaded Pole** and tighten it with a **10 mm Wrench**.

4. Attach the other end of the **Grounding Wire** to an **Earth Ground Connection**.
