Compliance Statements

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna
• Increase the separation between the equipment and receiver
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
• Consult the dealer or an experienced radio/TV technician for help

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. Regardless of any direct acknowledgement elsewhere in the body of this document, StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.
Safety Statements

Safety Measures

• Wiring terminations should not be made with the product and/or electric lines under power.
• Product installation and/or mounting should be completed by a certified professional as per the local safety and building code guidelines.
• Cables (including power and charging cables) should be placed and routed to avoid creating electric, tripping or safety hazards.

Mesures de sécurité

• Les terminaisons de câblage ne doivent pas être effectuées lorsque le produit et/ou les câbles électriques sont sous tension.
• L’installation et/ou le montage du produit doit être réalisé par un professionnel certifié et dans le respect des normes locales et du code de construction local.
• Les câbles (y compris les câbles d’alimentation et de chargement) doivent être placés et acheminés de façon à éviter tout risque électrique, de chute ou de sécurité.

安全対策

• 電源が入っている状態の製品または電線の終端処理を行わないでください。
• 製品の設置やマウントは、使用地域の安全ガイドラインおよび建築基準に従い、有資格の専門業者が行うようにしてください。
• ケーブル（電源ケーブルと充電ケーブルを含む）は、適切な配置と引き回しを行い、電気障害やつまづきの危険性など、安全上のリスクを回避するようにしてください。

Misure di sicurezza

• I terminali dei fili elettrici non devono essere realizzate con il prodotto e/o le linee elettriche sotto tensione.
• L’installazione e/o il montaggio dei prodotti devono essere eseguiti da un tecnico professionale certificato che conosca le linee guida locali sulle norme edilizie e sulla sicurezza.
• I cavi (inclusi i cavi di alimentazione e di ricarica) devono essere posizionati e stesi in modo da evitare pericoli di inciampo, rischi di scosse elettriche o pericoli per la sicurezza.
Säkerhetsåtgärder

- Montering av kabelavslutningar får inte göras när produkten och/eller elledningarna är strömförda.
- Installation och/eller montering får endast göras av behöriga yrkespersoner och enligt gällande lokala förordningar för säkerhet och byggnormer.
- Kablar (inklusive elkablar och laddningskablar) ska dras och placeras på så sätt att risk för snubblingsolyckor och andra olyckor kan undvikas.

Warning Statements

- Make sure to assemble this product according to the instructions. Failure to do so might result in personal injury or property damage.
- Never use this product if parts are missing or damaged.

Product Information

Packaging Contents

- Wireless Display Adapter x 1
- Universal Power Adapter (NA/UK/EU) x 3
- USB Cable to Power Adapter Port (optional for USB Power source) x 1
- 4 position A/V cable x 1
- Software Installation Disc x 1
- User Manual x 1

System Requirements

- HDMI-enabled display device w/ cabling (i.e. television, projector)
- Miracast, or 802.11n/g Wireless-enabled video source device (i.e. Smartphone, tablet, Computer system)
- USB Flash Drive (For updating the device’s firmware)
Installation

Installing the Display Adapter

1. Connect an **HDMI Cable** (sold separately) to the **HDMI Out Port** on the **Display Adapter** and the other end of the **HDMI Cable** to the HDMI In port on a **Display Device**.

2. Connect the **Universal Power Adapter** to the **Power Adapter Port** on the **Display Adapter** and the other end to an **AC Electrical Outlet**.

   - or -

3. Connect the **USB Power Cable** (included) to the **Power Adapter Port** on the **Display Adapter** and the other end to an available **USB Power Source**.

4. Press the **Power Button** on the **Display Adapter**.

5. The **Launch** screen will appear on the **Display Device** once the installation is complete.

   *Notes: The Launch screen may take several seconds to load. The appearance of the Launch screen may vary depending on the firmware version you are using.*
Upgrading Firmware

For optimal performance, make sure that the Display Adapter’s firmware is up to dated.

**Warnings:** Do not unplug the USB flash drive or power down the device until the new primary launch screen is displayed. Firmware upgrades are irreversible.

Identifying Firmware Version

- The firmware version number will be in the bottom right-hand corner of the Launch screen.

Updating from Version 1.6.5

1. Download the firmware update files from StarTech.com and unzip the compressed file.

2. Copy install.img and install_sp.img from the downloaded folder to the root directory (the parent/top directory) of the USB flash drive.

3. Ensure the Display Adapter is powered off.

4. Plug the USB flash drive into the USB Media Input on the Display Adapter.

5. Hold down the Mode Select Button and turn on the Display Adapter by pressing the Power Button. Continue to hold down the Mode Select Button while the device powers on.
6. Release the **Mode Select Button** after the **Please wait for USB update** appears on your **Display Device**.

7. The firmware on your **Display Adapter** will now update. Once the update has completed the **Launch** screen will appear.

**Update from Version 2.0.0**

1. Download the firmware update files from StarTech.com and Unzip the compressed file.

2. Copy `install_sp.img` from the downloaded folder to the root directory (the parent/top directory) of the USB flash drive.

3. Once the file has been moved to your USB flash drive, rename `install_sp.img` file to `install.img`.

4. Ensure the **Display Adapter** is powered off.

5. Plug the USB flash drive into the USB Media Input on the **Display Adapter**.

6. Hold down the **Mode Select Button** and turn on the **Display Adapter** by pressing the **Power Button**. Continue to hold down the **Mode Select Button** while the device powers on.

7. Release the **Mode Select Button** after the **Please wait for USB update** appears on your **Display Device**.

8. The firmware on your **Display Adapter** will now update. Once the update has completed the Launch screen will appear.
Connecting to a Smartphone or Tablet

The Display Adapter can connect (through a wireless connection) to a Miracast enabled device (smart phone or tablet).

1. Set the Display Adapter to Miracast mode. Press the Mode Select Button until the Miracast Launch screen is displayed.

   ![Miracast Launch screen]

2. The Miracast Launch screen will display the Adapter name and Adapter ID.

   **Note:** The Display Adapter name cannot be edited/changed.

3. Connect to the Display Adapter using your Miracast-enabled smartphone or tablet.

   **Note:** Exact steps regarding Miracast setup will vary depending on your device. Please review the documentation included with your smartphone or tablet.
Connecting to a Computer

The **Display Adapter** can connect (through a wireless connection) to a **Computer** with an Operating System (OS) Window 8.1 or higher.

**Note:** Please ensure the drivers for your graphics adapter and wireless adapter are up to date.

1. Launch the **Windows 8 Charms Bar** and select **Devices**.
2. Select **Project**, then **Add a wireless display**.
3. Select the **Display Adapter** from the list of devices.
4. If you are prompted for a PIN code, enter the PIN code that pops up on the **Display Adapter** screen and click **Next**.
5. If you are prompted for a PIN code, enter the PIN code that pops up on the **Display Adapter** screen and click **Next**.
AllShareCast/Screen Mirror Device (Samsung)

1. Open the **Settings** menu.
2. Select **More Settings**.
3. Scroll through the list and select **AllShare Cast** or **Screen Mirror** (depending on your version of Samsung device).

4. Turn **AllShare Cast** ON and select the device name from the list. By default **Display Adapter** will be listed as the device name. Tap the device to connect.
5. The smartphone or tablet screen will now be shared on your Display Device.
Android Nexus Device 4.2 or Higher

1. Open the **Settings** menu.

![Settings menu](image)

2. Select **Display**.

3. Select **Wireless display** or **Cast screen** (depending on your version of Android).

4. Turn Wireless display ON and select the device name from the list. By default **Display Adapter** will be listed as the device name. Tap the device to connect.
5. The smartphone or tablet screen will now be shared on your **Display Device**.

**Configuration**

**Accessing the Remote Control Interface**

1. Once the **Display Adapter** is connected to your TV and powered on, the **Miracast Launch** screen will show on the display.

2. Press the **Mode Select** button beside the USB port. A secondary **Launch** screen will load.

   **Note:** You will want to be in the same room as the display connected to the **Display Adapter**.

3. Connect your Smartphone, Tablet, or Laptop to the SSID of the device. By default the SSID for the device is WIFI2HDMC xxx with no security key.
4. Once you have connected to the device, open a web browser and enter the IP address (http://192.168.59.254) in the address bar. The **Airfun Launch** screen will appear.

**Note:** The IP address is also listed on the display. The default is http://192.168.59.254.
5. Select the **Remote Control** button to access the **Remote Control** screen.

![Remote Control screen](image)

**Remote Control screen**

**Configuring a Wired Connection**

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

![Setup screen](image)

**Setup screen**

2. From the **Setup** screen, click on the **Network** tab.
3. Click on the **Wired Connection** link.
4. A pop-up screen will appear with the following options:
   - **Obtain an IP address automatically:** An IP address from DHCP server will be assigned automatically.
   - **Set IP address manually:** Allows you to set an IP address manually
     - **Subnet Mask:** Enter the Subnet Mask e.g. 255.255.255.0
     - **Gateway Address:** Enter the Routers address
     - **DNS Server:** Enter the IP address of the DNS (Domain Name Service) server.

**Changing the Device Name**

The **Device Name** will be used as the SSID name while board casting in ad hoc mode and as the device name within the ScreenShare software.

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.
2. From the **Setup** screen, click on the **Network** tab.
3. Click on the **Device Name** link.

   ![Device Name Link](image)

4. Enter the **Device Name** of the presentation gateway.

   **Note:** The **Device Name** default is WIFI2HDMC.
Configuring a WiFi Connection

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

![Setup screen](image)

2. From the **Setup** screen, click on the **Network** tab.

3. Click on the **Wifi Connection** link.

![Wifi Connection link](image)

To view manuals, videos, drivers, downloads, technical drawings, and more visit www.startech.com/support
4. A list of available wireless access points (AP) will be displayed.

5. Select the desired wireless AP.

   **Note:** The selected wireless AP may require a password.

**Configuring Virtual AP**

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

   ![Setup screen](image)

2. From the **Setup** screen, click on the **Network** tab.
3. Click on the **Virtual AP Setup** link.

![Virtual AP Setup link](image)

4. A pop-up screen will appear with the following options:
   - **Radio Band:** Set the Radio band to 2.4GHz or 5GHz.
     
     *Note:* Please confirm that your PC/Notebook supports 5GHz operation before you set the radio band to 5GHz.
   - **Security:**
     - **Open:** Disables wireless encryption.
     - **WPA:** Enable WPA encryption. Wireless clients must support WPA encryption and know the encryption passphrase you set here.
   - **Region:** Choose your region.

5. Click the **Save** button to save the changes to the virtual AP configuration.
Creating a Bridge to a Wireless Connection

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

![Setup screen](image)

2. From the **Setup** screen, click on the **Network** tab.

![Network tab](image)

3. Click on the **Wifi Connection** link.
4. A list of available wireless access points (AP) will be displayed.

5. Select the desired wireless AP.

   **Note:** *The selected wireless AP may require a password.*

Creating a Bridge to a Wired Connection

1. Connect a **LAN Cable** from the **Display Adapter** to the **AP Router**.

2. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

   ![Setup screen](image)

3. From the **Setup** screen, click on the **Network** tab.
4. Click on the **Wired Connection** link.

5. A pop-up screen will appear with the following options:
   
   - **Obtain an IP address automatically**: An IP address from DHCP server will be assigned automatically.
   
   - **Set IP address manually**: Allows you to set an IP address manually
     
     - **Subnet Mask**: Enter the Subnet Mask e.g. 255.255.255.0
     
     - **Gateway Address**: Enter the Routers address
     
     - **DNS Server**: Enter the IP address of the DNS (Domain Name Service) server.
Configuring Night Mode

**Night Mode** allows you to keep theater sounds at a lower volume. It increases the level of low level audio while decreasing the level of high level audio.

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

![Setup screen](image-url)
2. From the **Setup** screen, click on the **Audio** tab.

![Audio screen](image)

3. Click the **Night Mode** link to enable or disable the mode.

**Setting HDMI Output Method**

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

![Setup screen](image)

2. From the **Setup** screen, click on the **Audio** tab.
3. Click the **HDMI Output** link and select an **HDMI Output Method** from the drop-down list.

### Configuring a Surround Sound Mode

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

2. From the **Setup** screen, click on the **Audio** tab.
3. Click the **Surround Sound** link and select a mode from the drop-down list.

**Configuring Lip Sync Mode**

**Lip Sync** mode synchronizes audio and video together so no audio delay is visible within the video.

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.
2. From the *Setup* screen, click on the *Audio* tab.

3. Click the *Lip Sync* link and select a mode from the drop-down list.
Configuring Aspect Ratio

Allows you to manually set a video aspect ratio.

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

2. From the **Setup** screen, click on the **Video** tab.
3. Click the **Aspect Ratio** link and select a ratio from the drop-down list.

**Configuring a TV System**

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

![Setup screen](image)

2. From the **Setup** screen, click on the **Video** tab.

![Video screen](image)
3. Click the **TV System** link and select an option from the drop-down list.

**Scaling Video Output**

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

2. From the **Setup** screen, click on the **Video** tab.

To view manuals, videos, drivers, downloads, technical drawings, and more visit www.startech.com/support
3. Click the **Scale Video Output to 90%** link to enable or disable the feature.

### Configuring Video Output

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

![Setup screen](image1)

2. From the **Setup** screen, click on the **Video** tab.

![Video screen](image2)

To view manuals, videos, drivers, downloads, technical drawings, and more visit www.startech.com/support
3. Click the **1080p 24Hz** link to enable or disable the feature.

**Setting the On-Screen Display Language**

1. From the *Remote Control* screen, click on the *Setup* Button, the *Setup* screen will appear.

![Setup screen](image)

2. From the *Setup* screen, click on the *System* tab.

![System screen](image)
3. Click the **Language** link and select a language from the drop-down list.

**Resetting the Display Adapter to Factory Settings**

1. From the **Remote Control** screen, click on the **Setup** Button, the **Setup** screen will appear.

   ![Setup screen](image)

2. From the **Setup** screen, click on the **System** tab.

   ![System screen](image)

To view manuals, videos, drivers, downloads, technical drawings, and more visit www.startech.com/support
3. Click on the **Factory Default** link to reset the **Display Adapter** to the factory defaults.

4. Power cycle the **Display Adapter** for the changes to take place.

**Resetting the Display Adapter’s IP Address**

The **Reset** button is located on the bottom of the **Display Adapter**.

1. Using a Pen gently press and hold the recessed **Reset** button for 10 seconds while the **Display Adapter** is still connected to the **AC Power Adapter**.

2. The **IP Address** and **Name** will return to the factory default setting.
Checking the Current Firmware Version

*Note: the firmware version can also be found on the Screen-Share Home screen.*

1. From the *Remote Control* screen, click on the *Setup* Button, the *Setup* screen will appear.
2. From the **Setup** screen, click on the **System** tab.

![System screen](image)

3. Click on the **Version Info** link to see the current firmware version.

   **Note:** To update the firmware please refer to the *Updating Firmware* section of the manual.
ScreenShare Mode

Installation

1. Ensure you have .NET Framework version 3.5 installed prior to installing ScreenShare.

2. Insert the included software CD into the computer’s CD/DVD drive. You may also download the latest version from our website.

3. Run the Autorun.exe application from the Autoplay menu. If Autoplay is disabled on your system, browse to your CD/DVD drive and run the application.

4. Choose Typical Installation from the following screen and click Install.

5. Follow the on screen instructions to complete the installation.
6. When finished, restart the computer.

**Logging into ScreenShare**

1. Switch the **Display Adapter** device into ScreenShare mode by pressing the **Mode Select** button on the **Display Adapter** (located next to the USB connector).

2. The **Home** screen will appear on the **Display**.

   **Note:** The Login Code will be displayed at the bottom of the screen.
3. On your Notebook / PC, search and connect to the **Display Adapter’s** SSID (wireless network) on the **Wireless Network Connection** screen.
4. Click the **ScreenShare** icon from your desktop or **Start** Menu.

5. ScreenShare will auto detect the **Display Adapter**. Enter the input **Login Code** that is located in the top right-hand corner of the **Home** screen as indicated in step 2, then click **OK**.
ScreenShare Login screen

Checking the MAC Address

• The MAC address can be found on the Home screen, and is located on the bottom right of the Home screen.
ScreenShare Panel Controls

1. Once you have logged into the ScreenShare app the **Panel Control** screen will appear.

   ![Panel Control screen](image)

2. From the **Panel Control** screen the following controls are available:
   - **Play/Pause:** Starts or pauses the presentation.
   - **Stop:** Stops the presentation and returns to the Information screen.
   - **Menu:** Allows you access to advance menu options.
   - **Login Code:** Displays the current login code.
   - **Mute:** Mutes the volume of the presentation.
   - **Volume Up/Down:** Turns the volume of the presentation up or down.
   - **Information:** Displays application information (adapter name, IP address, radio band, version).
   - **Minimize:** Minimizes the **Panel Control** screen to the Taskbar.
   - **Close:** Closes the **Panel Control** screen.
Configuring a Display Mode

1. From the *Panel Control* screen, select the **Menu** icon.
2. The **Menu** screen will appear.

![Menu screen](image)

3. Select the **Display Mode** link, a pop-up screen will extend.

![Display Mode screen](image)

4. Select either:
   - **Mirror Mode**: Mirrors the content on the main display.
   - **Extend Mode**: Extends the main display’s viewing area two multiple displays allow for a larger display area.

To view manuals, videos, drivers, downloads, technical drawings, and more visit www.startech.com/support
5. Select which display the mode will apply to.

Select a display

Configuring a Display Resolution

1. From the Panel Control screen, select the Menu icon.
2. The Menu screen will appear.
3. Select the **HDMI Resolution** link, a pop-up screen will extend.

4. Select a **Resolution** from the pop-up screen.
Configuring the Display’s Aspect Ratio

1. From the Panel Control screen, select the Menu icon.
2. The Menu screen will appear.

3. Select the Aspect Ratio link, a pop-up screen will extend.

4. Select an Aspect Ratio from the pop-up screen, which allows you to set the width and height ratio of the display.
Enabling Auto Resolution

1. From the **Panel Control** screen, select the **Menu** icon.
2. The **Menu** screen will appear.

   ![Menu screen](image)

3. Select the **Settings** link, the **Settings** screen will appear.

   ![Setting screen](image)

4. Select **Enable Auto Adjust Resolution** to enable/disable automatic resolution adjustments.

To view manuals, videos, drivers, downloads, technical drawings, and more visit www.startech.com/support
5. Click the **Apply** button to save the changes made on the **Settings** screen.

**Enabling Auto Save**

1. From the **Panel Control** screen, select the **Menu** icon.
2. The **Menu** screen will appear.

![Menu screen](image)

3. Select the **Settings** link, the **Settings** screen will appear.

![Setting screen](image)

To view manuals, videos, drivers, downloads, technical drawings, and more visit www.startech.com/support
4. Select **Enable Auto Save** to enable/disable the auto save function.

5. Click the **Apply** button to save the changes made on the **Settings** screen.

### Exiting the ScreenShare App

1. From the **Panel Control** screen, select the **Menu** icon.

2. The **Menu** screen will appear.

3. Select the **Exit** link.

4. A **Confirmation** screen will appear asking **Do you really want to exit?** click the **Yes** button to exit to the Login screen.
   - or -
   Click the **No** button to return to the ScreenShare App.
Playing Media from a USB Stick

1. Connect your Smartphone/Tablet or Notebook to the WIFI2HDMC device and navigate to the Setup (remote) page using a web browser.

2. Plug your USB stick into the port located on the side of the WIFI2HDMC device.

3. Navigate the USB stick contents using the web remote to choose the video, music or picture file you would like to view.

AirFun Utility

Installation

The AirFun utility is available for PC (on the included software CD), iPhone or Android platforms.

Android/iPhone

• Download and install the latest version of the AirFun utility from your mobile app store.

PC

1. Insert the included software CD into the computer’s CD/DVD drive, or download the latest drivers from http://www.startech.com.

2. Run the Autorun.exe application from the Autoplay menu. If Autoplay is disabled on your system, browse to your CD/DVD drive and run the application.

3. Select Software Installation from the menu.
4. Choose **Typical Installation** from the following screen and click Install.

   **Note:** This will install both the AirFun and the ScreenShare utilities (outlined later in this manual). Should you only desire to install only the AirFun utility, choose Custom Installation and de-select Screenshare.

5. Follow the on screen instructions to complete the installation(s).

**Operation**

**Android/iPhone**

1. Open the AirFun app, it will begin to automatically search for the Display Adapter.

2. Once found, tap the buttons for either **Photo/Music Playback** or **Video Playback** and choose the file you wish to view/play.
PC

1. Click the **AirFun** icon from your desktop or **Start** Menu.

2. The AIRFUN utility will begin to search for the WIFI2HDMC device. If the device is not found before the timeout period, it will display **No device found**.
3. If successfully connected, you should be able to see your PC screen on the TV.

![Found Device screen](image)

3. If successfully connected, you should be able to see your PC screen on the TV.

4. Drag the video/photo/music file to the **Airfun** main menu directly.

5. For video files, drag files to the **Video Playback** folder.

6. For photo/music files, drag files to the **Photo/Music Playback** folder.
Warranty Information

This product is backed by a two-year warranty.

For further information on product warranty terms and conditions, please refer to www.startech.com/warranty.

Limitation of Liability

In no event shall it be the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the use of the product exceed the actual price paid for the product.

Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.
**Hard-to-find made easy. At StarTech.com, that isn’t a slogan. It’s a promise.**

StarTech.com is your one-stop source for every connectivity part you need. From the latest technology to legacy products — and all the parts that bridge the old and new — we can help you find the parts that connect your solutions.

We make it easy to locate the parts, and we quickly deliver them wherever they need to go. Just talk to one of our tech advisors or visit our website. You’ll be connected to the products you need in no time.

Visit www.startech.com for complete information on all StarTech.com products and to access exclusive resources and time-saving tools.

StarTech.com is an ISO 9001 Registered manufacturer of connectivity and technology parts. StarTech.com was founded in 1985 and has operations in the United States, Canada, the United Kingdom and Taiwan servicing a worldwide market.

**Reviews**

Share your experiences using StarTech.com products, including product applications and setup, what you love about the products, and areas for improvement.
