

# Firmware Upgrade Procedure

First extract everything in this ZIP file to a folder on your Computer and take note of where it is located

1. On the KVM web console, Select "**Firmware**" from the menu on the left
2. Click on the "**Browse**" button and select the firmware file from the path you extracted it to at the beginning of this process
3. To start the update process click the "**Upload firmware**" button
4. You should now see a screen that says, "**Writing to flash**". Once the progress gets to 100% completed it should automatically reboot the unit
5. Once done, you can click on the "**Click here when completed**" to refresh the screen
6. Login again and check System firmware version to be sure it completed successfully
