FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. Regardless of any direct acknowledgement elsewhere in the body of this document, StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.

Introduction

Thank you for purchasing a StarTech.com PCI to PC Card (PCMCIA/ CardBus) host controller adapter card. This product allows you to insert and use a wide array of CardBus and PCMCIA compliant products on your desktop computer, including wireless network cards and GPS devices, just like it was in a notebook. Now you don't have to have separate adapters for your notebook and desktop computers, saving you time and money.

Features

- Easy plug-and-play installation
- Hardware-based solution - eliminates loss of performance with your peripherals
- Supports 16-bit PCMCIA and 32-bit CardBus cards

Before You Begin

System Requirements

- IBM-compatible computer with an available PCI slot
- Microsoft® Windows® 2000/ XP(32/64-bit)/ Server 2003(32/64-bit)/ Vista(32/64-bit)/ 7(32/64-bit)/ Server 2008 R2

Packaging Contents

This package should contain:

- 1 x PCMCIA/CardBus to PCI Adapter Card
- 1 x Instruction Manual

Installation and Usage

This section will guide you through the installation of your PCI card and the related software. Please read through the instructions carefully and complete each step in the order listed.

Hardware Installation

WARNING: Be sure that you are properly grounded before opening your computer case or touching any components. StarTech.com recommends that you wear an anti-static strap when installing any computer equipment. If an anti-static strap is unavailable, discharge yourself of any static electricity buildup by touching a large grounded metal surface (such as the computer case) for several seconds.

1. Make sure that your system is unplugged and you are grounded.
2. Remove the cover of your system (see your computer's user manual for details, if necessary) and gently turn your computer onto its side, leaving the open side of the case exposed.
3. Locate an empty PCI slot (usually white in color) and remove the blank slot cover from the back of the computer.
4. Align the card horizontally with the slot and gently insert it into the empty slot, making sure it is firmly seated.
5. Secure the card in place using the screw you removed in Step 3 (if applicable).
6. Put the computer cover back on.
7. Power on the computer normally

Software installation

Windows XP/Vista/7

No additional software installation is required, in order to use PCI to PC Card Adapter with the Windows operating system, as the required drivers are installed automatically once the operating system is booted up following hardware installation.

Inserting a CardBus card

1. Once the computer has fully rebooted following software installation, align the PC (CardBus) card with the slot provided by PCI to PC Card Adapter. Gently push the card into the slot until the Ejector Tab pops out.
2. Windows should recognize the inserted card automatically, and ask for the software driver. Please refer to the user manual provided with the PC (CardBus) card at the time of purchase.
3. After the drivers have been installed, the corresponding power indicator will light up, indicating that the card is now powered and ready for use.

Removing the inserted CardBus card

1. To remove your PCMCIA card while the unit is running, click on the Safely remove Hardware icon near the clock in the Windows taskbar (typically found in the lower right corner of your screen.) Highlight your PCMCIA card and then click on the Stop button. When the confirmation window appears click on the OK button.
2. Push the Ejector Tab, and remove the PC Card (PCMCIA) from the slot.

Specifications

Host Interface	PCI 5V/3.3V 32 bit card
Chipset	ENE CB-1410QF
Os Support	Windows 2000/ XP(32/64-bit)/ Server 2003(32/64-bit)/ Vista(32/64-bit)/ 7(32/64-bit)/ Server 2008 R2
Regulatory Certifications	FCC, ROHS, CE
Supported PC Cards	16-bit PCMCIA 2.1 / JEIDA 4.2 cards, 32-bit CardBus cards

Technical Support

StarTech.com's lifetime technical support is an integral part of our commitment to provide industry-leading solutions. If you ever need help with your product, visit www.startech.com/support and access our comprehensive selection of online tools, documentation, and downloads.

Warranty Information

This product is backed by a lifetime warranty.

In addition, StarTech.com warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replacement with equivalent products at our discretion. The warranty covers parts and labor costs only. StarTech.com does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability

In no event shall the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the use of the product exceed the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.
